

**IN THE CLAIMS**

1. (Currently amended) A method of treating inflammatory bowel disease (IBD) in a patient in need thereof which comprises orally administering to the patient an effective amount of a pooled human polyclonal immunoglobulin preparation.
2. (Original) The method according to Claim 1 wherein the inflammatory bowel disease is ulcerative colitis (UC).
3. (Original) The method according to Claim 1 wherein the inflammatory bowel disease is Crohn's disease.
4. (Currently amended) A method of treating mucosal inflammation which comprises orally administering to a patient suffering from said mucosal inflammation an effective amount of a pooled human polyclonal immunoglobulin preparation.
5. (Original) The method according to any one of Claims 1-4 wherein the immunoglobulin is at least one of immunoglobulin G (IgG), immunoglobulin A (IgA) or a mixture of immunoglobulin G (IgG) and immunoglobulin A (IgA).
6. (Original) The method according to any one of Claims 1-4 wherein the immunoglobulin preparation is dispersed in a pharmaceutically acceptable carrier.
7. (Original) The method according to any one of Claims 1-4 wherein the amount of immunoglobulin administered to said patient is from about 0.5 to 1.5 grams at least once a day.

8. (Original) The method according to any one of Claims 1-4 wherein the immunoglobulin is enterically coated.

9. (Currently amended) A method of treating inflammatory bowel disease (IBD) in a patient in need thereof which comprises orally administering to the patient a pooled human polyclonal immunoglobulin preparation comprising at least about 25% IgG antibodies.

10. (Currently amended) A method of treating mucosal inflammation which comprises orally administering to a patient suffering from said mucosal inflammation a pooled human polyclonal immunoglobulin preparation comprising at least about 25% IgG antibodies.

11. (Withdrawn) A method of treating inflammatory bowel disease (IBD) in a patient in need thereof which comprises orally administering to the patient a pooled human polyclonal immunoglobulin preparation comprising at least about 30% to about 85% IgG, about 5% to about 30% IgA and about 1% to about 25% IgM polyclonal antibodies.

12. (Withdrawn) A method of treating mucosal inflammation which comprises orally administering to a patient suffering from said mucosal inflammation a pooled human polyclonal immunoglobulin preparation comprising at least about 85% IgG, about 5% to about 30% IgA and about 1% to about 25% IgM polyclonal antibodies.

13. (Currently amended) The method of any one of ~~Claim~~Claims 1, 4 or 9-10 wherein said pooled human polyclonal immunoglobulin preparation comprises immunoglobulins pooled from human individuals.

14. (Cancelled)

15. (New) The method of any one of ~~Claim~~Claims 1, 4 or 9-10 wherein said pooled human polyclonal immunoglobulin preparation is non-antigen specific.
